Concept :

Forest Ecosystem in Protected Areas shows distribution of grasslands , the % of forest should be 33% and grasslands 7 % ; but recently grasslands areas are decreasing year by year due to invasion of woody species and invasive weeds. Herbivores require grasslands for grazing , breeding , nesting , hiding habitats for wild habitat management.

Grasses are annual , perennial , soft , course , palatable and non palatable. Grasslands are of three types smaller , intermediate and taller. Soil present in forest ecosystem determines composition of grasslands. Fodder value of grasses determined by chemicals , nutrients , fiber % before and after flowering. Grasslands development and management in Protected Areas like Tiger reserve , Sanctuary is important work and to train frontline staff is regular work from 2012.

To know the soil characters, profile for grassland development in natural pastures, degraded areas of forest and lantana removed areas for restoration of grasslands. To manage the grazing, browsing, breeding, nesting habitats.

To train the frontline staff for

- **Grasses, weeds and wild leguminous plants identification from forest areas.**
- **Eradication of weeds from grasses for habitat improvement**
- **Brushwood management**
- **Geo mapping of grasslands**
- **Grasses seeds collection, storage and enrichment.**
- **Restoration of grasslands**
- **Enrichment of grasslands**
- **Wild legumes seeds addition in grasslands**
- **Soft and course feeder herbivores habitat management**
- **Ecological restoration of degraded areas by grasslands development.**

The Context :

The Protected Areas includes Tiger Reserves, National Parks, Wildlife Sanctuaries, the wildlife like Herbivores, Omnivores, Carnivores habited in the protected areas. The grasses are the producers, soil binders , provides chemical energy to the wildlife in the form of fodder species. The protected areas forest are with 2-4.5 % grasses naturally it should be 6 %- 7%. Now recently natural grasslands and relocated areas of the Protected Areas are developing in to good grasslands for the herbivores. Grasslands are the green ground cover of protected areas in forest. The grasses are useful for grazing habitat of wildlife (Herbivores). The threats to the grasslands are soil degradation, loss of soil moisture, leach out of nutrients of the soil, forests fires, weed infestation, woody species encroachment, and change in grasslands

Composition, exotic species and decrease in nutritive value of the fodder grasses. The faculty member of the department of the college has the good expertise in the grasses, weeds and forests flora identification and their nutritive values.

The grassland management practices include

1. To give the field training to the forests field staff in the natural grasslands and relocated areas of the Protected Areas in each season of the year.
2. To know the exact area of grassland year wise by demarcation of grassland area by GPS.
3. Grasses identification training to field staff by local names and scientific names.
4. Weeds identification with local names and their flowering season.
5. Browsing species identification with local names.
6. Field training to collect the grasses seeds and wild legumes seeds.
7. Weed eradication programme two times in a year
8. Grasslands enrichment by seed broadcasting in May - June season.

9. Grasses biomass management practices in mosaic pattern.
10. Wild fruit trees identification and addition in relocated areas.
11. Complete training programmes are organized by the CCF & Field Director of the respective Tiger Reserves in each season.

The practices in the field:

1. Grasses identification – October
2. Weeds identification – August
3. Wild leguminous plants identification –September
4. Weeds uprooting three times in each year.
5. Grasses seeds collection – September to February
6. Wild legumes seeds collection - November – December
7. Grasses seeds addition in selected areas for grassland development
8. Observation of grasslands.
9. To know the composition of grasslands.
10. Brushwood management to reduce woodland.
11. To prepare grassland management register.

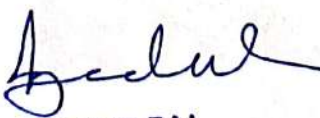

The detailed reports of field workshops for frontline staff are attached in the extension activity report with Text , Images with Geo-tag and appreciation letters.

Results of Extension activity:

- Capacity building of frontline staff of Protected Areas.
- Field interventions for habitat improvement in Protected Areas.
- E Herbarium of grasses and identification
- Documentation of bench marks and results
- Comparative analysis before and after work
- Ecological restorations of grasslands

Subject: Appreciation letter for immense contribution and grassland management and research at the Tadoba-Andhari Tiger Reserve, Chandrapur Maharashtra

The Tadoba-Andhari Tiger Reserve would like to express our sincere appreciation for the invaluable contributions and guidance of Dr. Gajanan Muratakar in the field of grassland management and research at TATR from the year 2021 to date, as per the collaborative MOU.

Dr. Muratakar has been providing appropriate training to frontline staff regarding grassland management practices and increasing their interest in the field of grassland research, which is a great achievement for us. TATR officers and frontline staffers are happy to have a better understanding of grass identification and management in the field through the book "Identification of Grasses in TATR" written by Dr. Muratakar.

These grassland management practices are very important for increasing the habitat of herbivorous animals and their population and it is directly useful for increasing the Tigers and their safe habitat. Another benefit to tiger reserve is reducing the man-animal conflict by developing safe, secure ideal habitats for herbivores.

The guidance of Dr. Muratkar has been invaluable in helping us to develop and implement effective strategies for the management of grasslands, which are critical habitats for many endangered species in the tiger reserve. Your efforts have played a vital role in the Conservation and Protection of the Tiger Habitat.

Thank you!

Report of the Activity
Extension Activity: Plastic Free Environment
Academic Year: 2023-2024
Department of Chemistry

Date: 11th October 2023
Venue: ASCC, Seminar hall
Objectives of program: To aware about polythene plastic bag pollution.
Making our environment an eco-friendly zone.

Reference: MAHARASHTRA NON-BIODEGRADABLE GARBAGE (CONTROL) Act,
2006. No. Plastic-2022/C.R.104/TC-1.— Notification, 2018 dated 23rd March, 2018,

Brief Report: In the academic session 2023-24 Department of Chemistry organized Extension Activity program for the students. The program conducted on 11th October 2023 in Seminar hall.

Mr. Rahul P. Rahate, Assistant Professor in Chemistry anchored the program. Dr. U. S. Wasnik, HOD in her speech gave brief introduction about the Extension activity of the department, addressed the students and insist students to avoid use of single use plastic. Shown ppt on plastic bag pollution. Aware the students about how plastic polythene bags polluted the air when plastic bags burn, it releases toxic substances into air causing air pollution, also the harmful effect of plastic bags on human beings, animals and the environment.

Plastics do not undergo degradation, stays in the soil for many years, which affects soil fertility and degrades the soil quality. When plastic enter the drainage and sewerage system, it blocks the pipes and the drains causing water logging. The improperly disposed of food bags, when eaten by animals, cause stomach and intestine related diseases which even lead to suffocation and death. Plastic items find their way to the river and other water bodies, which are then swallowed by fish, seabirds, and other marine species. Proper disposal and usage of plastic discards can reduce these problems. A set of regulations should necessarily be followed to stop these problems.

At the end of program all the students took oath that they not to use plastic bags and use only cotton bags & save earth. The program ended by vote of thanks.

Such types of workshop can provide an opportunity to the student for their better future. ED cell is planning for the commercial production of these types of lamps. We will provide all the facilities and kits to the students and they will manufacture the lamps. These lamps will be purchased by the cell and will be sold through its outlets. This will provide some financial help to the students and they can earn while learn.

There is a very thought-provoking statement which says 'Education is the most powerful weapon which you can use to change the world'. by mark twain. education is basic human right. as far as our indian national education policy is concerned, we need many more drastic changes in our education policy, our education is getting theory-based over the time. practical knowledge of students is damaged due to this concept. as we can see the suicidal rates in india among teenagers is growing rapidly. and the only reason behind is unwanted educational pressure. so before claiming the changes we should focus on that factor as well. In today's time knowledge oriented education is the need of an hour, many european countries has introduced this concept 100 of years before. but we as a country failed in that regard, our teachers also teaches us in theory and bookish information. we don't know the concept but because we are going to get some marks so we just learn and they gave us few marks. we don't even care about the knowledge. so in my opinion our national policy should more focus on knowledge rather than just marks which can make good future....

The above picture shows the new parliament house of India which is situated in New Delhi. It houses the both Lok Sabha and Rajya Sabha. As a part of Central Vista Redevelopment project, a new parliament building was constructed in New Delhi. The inauguration date is 28 May 2023 by our Prime Minister Narendra Modi. The new parliament house was first used for official business on 19th September 2023 during the parliament special session, with the name designation parliament. The old parliament architecture built in 1927 was designed by British architects. The new complex has a hexagonal shape and it is built next to existing complex and is almost equal to the former one. The design of this parliament building resembles the Vijaya temple of Vidisha.

2023-24

Internal Complaint Committee

- **Date** : 2 April 2024
- **Venue** : Seminar Hall, Art's, Sci. & Commerce College Chikhaldara
- **Objectives** :
 1. Promote equal to access to opportunity and education.
 2. Empower Women for better futures
 3. Eliminate gender-based violence
 4. Increase women's participants in decision making.
 5. Promote Positive gender roles.
- **Brief Report** :

Internal Complaint Committee arranges Guest lecture for the students on Gender Equality on 2nd April 2024. Gender equality is not only a fundamental human right, but a necessary foundation for a peaceful, prosperous and sustainable world. Gender equality prevents violence against women and girls. It's essential for economic prosperity. Societies that value women and men as equal are safer and healthier.

Dr.U.R.Kokate, Coordinator of Internal Complaint Committee introduced students about importance and work of committee. **Dr.S.N.Jagtap**, member and speaker gave valuable speech on gender equality.

Dr.S.N.Jagtap, guided such points: on 'Gender equality'

1. **Education and Awareness:** Education is the cornerstone of gender equality. We must educate ourselves and future generations about gender stereotypes and their harmful impacts. Schools and workplaces must encourage equal opportunities for all, breaking down barriers that limit individual potential.
2. **Promote Equal Pay:** Women still earn less than men for doing the same job. It is time to close the gender pay gap and ensure that wages are determined by skill and experience, not gender.

3. **End Gender-based Violence:** Gender-based violence affects millions around the world. Governments, communities, and individuals must work together to prevent violence, provide support for survivors, and hold perpetrators accountable.
4. **Support Women in Leadership:** Women must be given equal opportunities to lead, whether in business, politics, or other sectors. Diverse leadership results in better decision-making and progress for all.
5. **Encourage Men to Engage:** Gender equality is not just a women's issue; it's a human issue. Men and boys must be part of the conversation and the solution. They can be allies by challenging harmful gender norms and promoting a culture of equality.

In her speech she gave valuable information about gender equality and why it is important for society. Madam said that gender equality is a goal in itself and a prerequisite for sustainable and peaceful development. Gender equality is achieved when women, men, girls, and boys have equal rights, conditions and opportunities, and contribute to the development of society. Gender equality is essential to achieve peaceful society, with full human potential and sustainable development.

Dr. U.S. Wasnik, member of committee gave vote of thanks, and concluded the program.

Liquid waste management:

- The waste chemicals mixed water from laboratory passes through concealed pipe line into soak pit.
- Chemical liquid waste are diluted by lime treatment or equalisation of acid and base. Washroom and toilet liquid wastes in to the common drainage.

E-waste management

- The E-waste collected is stored in store room and disposed every year accordingly.
- Empty toners, cartridges, outdated computers and electronic items are sold as scrap to ensure their safe recycling.
