# IMPACT OF GOODS AND SERVICES TAX(GST) ON INDIAN MANUFACTURING AND TRADE ACTIVITIES

PROF. ASHISH RAMESHLAL KANHU

Assistant Professor,  
Department of Commerce,  
Arts, Science and Commerce College, Chikhaldara.

## Abstract

GST also known as the Goods and Services Tax is defined as the giant indirect tax structure designed to support and enhance the economic growth of a country. More than 150 countries have implemented GST so far. However, the idea of GST in India was mooted by Vajpayee government in 2000 and the constitutional amendment for the same was passed by the Loksabha on 6th May 2015. The Goods and Services Tax (GST), implemented on July 1, 2017, is regarded as a major taxation reform till date implemented in India since independence in 1947. The primary objective behind development of GST is to subsume all sorts of indirect taxes in India like Central Excise Tax, VAT/Sales Tax, Service tax, etc. and implement one taxation system in India. The GST based taxation system brings more transparency in taxation system and increases GDP rate from 1% to 2% and reduces tax theft and corruption in country. The paper highlighted the background of the taxation system, the GST concept and also presented in-depth coverage regarding advantages to various sectors of the Indian economy after levying GST and outlined some challenges of GST implementation.

## Introduction:-

Taxation was first imposed in Ancient Egypt around 3000 B.C.- 2800 B.C. during the first dynasty of the old kingdom. Records indicate from that period that the Pharaoh would conduct a biennial tour of the kingdom, collecting tax revenues from the people. Other data indications are granary receipts on limestone flakes and papyrus. Taxes are the only way for financing the public goods because of their inappropriate pricing in the market. It can only be levied by the government, via funds collected from taxes. It is highly important that the taxation system is designed in such an appropriate manner that it doesn't lead to any sort of market distortions and failures in the economy. The taxation laws should be highly competitive so that revenue can be raised in a highly efficient and effective manner.

In India, the taxation system was started in ancient times. The early taxation system's existence can be seen in many ancient books like Manu - Smriti and Arthashastra. During the British empire, the entire taxation system of India was transformed. It was entirely in favor of the

British empire, but it also incorporated modern and scientific techniques of taxation systems. Another remarkable transformation came in the year 1922 in the taxation system when Britishers established an entirely new administrative and taxation system in India. In this system, the taxation

system was categorized in two main categories: Direct Taxes and Indirect Taxes. In India, the taxation system is entirely controlled, imposed, and updated by Central and State governments. The authority to levy tax is derived from the Indian Constitution, which allocates the power to levy taxes between Central Government System and State Government System.

### **The Indian Taxation System - Scenario Before GST**

Tax policies play a vital role in any country's progress and have a direct impact on any country's economy in terms of efficiency and equity. A good taxation policy is that which takes care of the entire income distribution and also generates tax revenues in such a manner for Central and State Governments, which can lead to overall benefit in the nation's infrastructure, defense, public amenities, people's security, and a country's exports. The entire framework to impose indirect taxes comes under Constitutional provisions of India. Article 246, Seventh Schedule gives the right to Central and State Governments to levy taxes and collect indirect taxes on the basis of goods and services transactions. The taxation system varies from manufacturer to manufacturer on point of sale or level of imports or exports. Indirect taxation based collection systems are based on origin, and are designed to impose tax and collect the same at the event of happening of any taxable activity.

Various taxes are imposed on the Indian population by Central and State Governments like Central Excise, Service Tax, VAT, etc. Before the introduction of VAT in Sales Tax and CENVAT in Central Excise and Service Tax, the Indian Taxation System was very complex and this had cascading effects. The tax imposed on one destination was also taxed on another. However, in recent times, the taxation system has seen remarkable revolutions. Many changes in taxation were implemented, that is, VAT, and implementation of Service Tax by Central Government. With introduction of VAT based taxation system in India, the foundation stone of GST implementation was laid.

### **Research Methodology**

This paper is based on exploratory research technique and data cited in this paper were collected via secondary sources available like statistical data available on various websites of Indian Government like Finance Ministry ([finmin.gov.in](http://finmin.gov.in)), GST Council ([gstcouncil.gov.in](http://gstcouncil.gov.in)), GST Council Archives ([gstindia.com](http://gstindia.com)), and many more ; literature review from journal papers ; annual reports ; newspaper reports ; and wide collection of magazine based articles on GST. Based on the analysis of above mentioned data collection sources, the objectives of the study are defined and research design is drafted which is highly descriptive in nature.

### **Objectives of the Research Undertaken**

- The research has been undertaken and presented considering the following foremost objectives :
- ⊗ Understanding in - depth the concept of new taxation system introduced - Goods and Services Tax (GST) in India.
  - ⊗ Understanding the Impact of the GST on Manufacturing and Trade activities.
  - ⊗ To evaluate the advantages and challenges surrounding GST.
  - ⊗ To furnish the information for future research on GST based taxation system.

### Scope of the Study

This paper provides a detailed insight regarding implementation of GST tax among various sectors of the country. GST after implementation will bring uniformity with tax rates and will also overcome lots of shortcomings in the Indian taxation system with regard to indirect taxation. The Good and Services Tax would surely be highly advantageous for major areas of the India economy.

### Goods and Services Tax (GST) – Current Scenario

**(1) Need for GST- Goods and Services Tax :** As per the reports of Task Force on Goods and Services Tax (2009), the Indian taxation system led to misallocation of resources and lower productivity in terms of economic growth, international trade, and overall development of the Indian economy. Therefore, there was an emergent need to replace the existing tax system with a new engine of taxation of goods and services to attain the following objectives (Roychowdhury, 2012) :

- ⊗ The tax incidence fell primarily on domestic consumption.
- ⊗ The optimization of efficiency and equity of the Indian system is desired.
- ⊗ There should be no export of taxes across the taxing jurisdiction.
- ⊗ The Indian market should be brought under a single umbrella of common market.
- ⊗ Enhancement to the cause of cooperative federalism.

**(2) Introduction to the Goods and Services Tax (GST) :** New Article 366 (12A) of the Indian Constitution (GST India.com, 2016) defined Goods and Services Tax (GST) to mean any tax on supply of goods or services or both except taxes on the supply of alcoholic liquor for human consumption. As per the government, the Goods and Services Tax (GST) is regarded as a 'Reform' rather than amendment in the existing Indian taxation system to sort out all backdoors and cons of the indirect taxation system. The GST implementation is "dual" in nature - one component is implemented by Centre (CGST) and another component by State (SGST). The base of tax would be the same by Centre and State governments. GST came into effect in India on July 1, 2017. With some major modifications, the GST would now have three prime models :

- (i) Central GST : GST to be levied by the Centre.
- (ii) State GST : GST to be levied by the States.
- (iii) Dual GST : GST to be levied by the Centre and the States concurrently.

GST is regarded as a comprehensive and one tax system on manufacture, sale, and consumption of goods and services at the national level. As GST is implemented, all other taxes have been discontinued. There is now one tax, that too at the national level, strictly under the control of the Central Government. Under GST, there is one tax for both goods and services, which is a clear tax policy and this will improvise collections of tax. It also lead to a clear system and abolish tax based theft and corruption at the national level. GST being a friendly taxation system for the corporate sector will provide easiness in tax policies, reduce inflation levels, and make the overall system more transparent.

### (3) Importance of the GST Taxation System:-

GST will lay a strong foundation of collecting tax at early stage of value addition. Every business/tax payer would be a part of controlling and collecting the tax and remitting the proportion of tax

corresponding to its margin. GST will thereby flow through the business to taxsupplies made to the final consumer. GST Reforms will play a crucial role for government and consumers in the following manner :

(i) The Government : GST promises a lot for transparent working system for the government in the following manner :

- (a) easy and simple taxation system - one common tax across the country
- (b) tax base broadening,
- (c) great improvements towards collections of revenues
- (d) resource utilization would be more effective
- (e) investments out of savings by consumers - due to mitigation of cascading effect, which contributes to increase in availability of funds out of savings of consumer - which may be used for development.

(ii) The Consumer : For a normal Indian citizen, GST promises a lot in terms of better taxation system as follows:

- (a) reduction in the cost of goods and services due to significant elimination of cascading effect on taxes,
- (b) increase in household income and purchasing power
- (c) increase in savings of common man
- (d) high increase towards investment potential.

**(4) GST Council (GST Council, 2017) :** In order to implement GST taxation effectively in India, the Constitutional (122nd Amendment Bill) was introduced and passed by Rajya Sabha on August 3, 2016 and by Lok Sabha on August 8, 2016. The GST council was framed officially on September 8, 2016 after clearance from the Honorable President of India. As per Article 279A (1) of Amended Constitution, the GST Council was created by the President within 60 days of the commencement of Article 279A. The GST Council comprises of the following members :

- (a) Union Finance Minister- Chairperson
- (b) The Union Minister of State, In - Charge Revenue of Finance - Member
- (c) The Minister In-Charge or Taxation or any other minister nominated by each State Government - Members.

The GST Council was setup to perform the following duties :

- (a) taxes, surcharges, cess of Central and States which will be integrated in GST
- (b) goods and services to be exempted from GST
- (c) interstate commerce - IGST – distribution between State and Central governments
- (d) registration threshold limit for GST
- (e) GST floor rates
- (f) calamities special rates
- (g) provision with regard to special category rates, especially North-Eastern states.

### **(5) Statistical Analysis and Comparison of Indian GST Rate with Other Foreign Nations :**

In comparison with emerging market economies (EMEs), India has highest rate of GST @ 18% with major commodities falling under this rate of interest. Countries like China and Brazil have most of the commodities falling under 17% tax. Some of the developed economies like France, Germany, UK have GST @ 19 - 20%.

### **Impact of GST on the Indian Economy: Advantages and Challenges of GST Implementation**

#### **Advantages To Tradeactivities**

- 1.Reduction in multiplicity of taxes
- 2.Mitigation of cascading/ double taxation
- 3.More efficient neutralization of taxes especially for exports
- 4.Development of common national market
- 5.Simpler tax regime
- 6.Fewer rates and exemptions
- 7.Distinction between Goods & Services no longer required

#### **Advantages To Consumers**

- 1.Simpler Tax system
- 2.Reduction in prices of goods & services due to elimination of cascading
- 3.Uniform prices throughout the country
- 4.Transparency in taxation system
- 5.Increase in employment opportunities

#### **Impact of GST on the Indian Economy :**

GST will impact the overall taxation system of the Indian economy. It will improve the country's GDP ratio and also control inflation to a certain extent. However, the reform will mainly be advantageous to the manufacturing industry, but will make some things challenging for the service sector industry. The GST rate is implemented in various slabs like 5%, 12%, 18%, and 28%, which will automatically provide great tax increments to the government and the manufacturing sector will face immense growth with reduction in tax rate. There is definitely something good for everyone. Various unorganized sectors which enjoy the cost advantage equal to tax rate which will be brought under GST. This will make various sectors like Hardware, Paint, and Electronics etc. under the tax slab. GST requires everything to be planned meticulously for organized rate of taxation. There are still lots of sectors which are to be discussed under GST and this requires proper planning. For the common man and different companies, the collection of Central and State taxes will be done at point of time when sales originate, both components will be charged on manufacturing costs and price of the product will downgrade and consumption will thereby increase (Shokeen et al., 2017) .

## Positive Impact on manufacturer

### 1. One Tax :

In GST regime there is only one tax imposed on manufacturer i.e. GST. though there are three parts such as CGST, SGST and IGST but this is the huge relief to manufacture as they just has to pay only one tax for the product they manufacture.

### 2. No concept of manufacture :

the interpretation related to term Manufacture is no more be relevant. it may result in ease of doing business without having litigation about the process.

### 3. Rate of Tax :

the manufacturer has to pay GST by lower rates as compared to previous taxation system. as a result goods become cheaper and benefits manufacturer to compete with International market. though the rate varies industrywise but it is a good sign for the overall manufacturing industry.

### 4. Reduction in cost :-

Credit will be eligible of tax on purchase made from interstate purchases and there will be no cascading effect so it would bring down the cost of product and manufacturer can provide goods and services at low price to consumers.

### 5. No assessment by multiple tax authorities :-

there would be assessment of tax by centre, state and interstate authorities for GST only. no need of separate assessment for each tax by multiple tax authorities.

### 6. Speedy movement of goods :-

In GST regime there would be minimization of trade barriers, such as filling of way bills or entry permits. it would result in speedy movement of goods and enhance just in time delivery.

### 7. Minimization of Classification issues :-

Classification of good for separate rates on different goods and exemption would not be necessary due to uniform rate and less expected exemptions.

### 8. Statewise registration :-

In GST regime manufacturer has to register statewise not factorywise. it would result in efficient tax administration.

### 9. Valuation of samples :-

Time upto six months is granted to decide whether the goods sold on sample basis has been approved or not.

## Negative Impact

### 1. Time of supply :-

In GST regime the time of duty on manufacture would be earliest of the four such as date of issue of invoice, removal, debit in the books of receiver.

### 2. Increase in working capital :-

stock transfer has been made taxable, which require the huge working capital.

### 3. Introduction of reverse charge on goods

4. No credit of petroleum product
  5. No SSI exemption
  6. Increase in compliance burden
- Impact of GST on Trader

#### Positive Impact

1. Composition Levy increased :-

Limit under composition scheme is increase upto 50 lakhs which is beneficial to the traders.

2. No dispute of goods and services
3. Credit of excise duty and service tax
4. No margin to disclose
5. No reversal of credit on goods sent for stock transfer
6. Credit of CST

#### Negative Impact

1. Rate of tax
2. Stock transfer made taxable
3. No form 'C'
4. Compliance burden
5. Goods sent to job work are taxable

#### Impact of GST on Various Sectors :

Goods and Services Tax (Taqvi, Srivastava, & Srivastava, 2013) will unite the Indian economy into one common market under a single umbrella of taxation rates, leading to easiness of starting and doing businesses, leading to increase in savings and cost reduction among various sectors. Some industries will be empowered by GST because of reduction in tax rates, while some will lose because of higher rate of GST interests (Panda & Patel, 2010).

In this section, we discuss various sectors and elaborate the impact of GST on them :

(i) **IT Companies:** GST will allow more implementation of digital systems and services. GST will increase the rate of tax from 14 -15% to 18%, which will increase the cost of electronic products like mobile phones, laptops, etc. (Adhana, 2015).

(ii) **FMCG Industry :** GST will have a significant impact on the FMCG sector. Some food items are exempted under GST like grains and cereals, milt, meat, fish, fruits and vegetables, candy etc. Before GST, FMCG companies paid 24-25% tax including Excise Duty etc. With GST, the rate of return would be 17-19% leading to strong impact in production and consumption (Jain, 2013).

(iii) **Online Shopping :** With the introduction of GST, various Ecommerce companies will face much burden of work in rate of filling taxes and cost will be increased.

(iv) **Telecom Sector :** With the current VAT charges of 15% being replaced by 18% GST rate, the price of mobile calling, SMS, and broadband services would be impacted. This will have a negative impact for big telecom giants like Airtel, Vodafone, Idea, etc.

(v) **Automobiles** : GST will provide reduction on on-road price of vehicles to max by 8% as per the latest report. Lower prices mean various automobile companies can boost up volumes and sales and have tremendous opportunities for expansion in India.

(vi) **Small Scale Enterprises** : There are three categories: (a) below threshold, need not register for GST, (b) between threshold and composition turnovers will have the option to pay a turnover based tax or opt to join the GST regime, (c) above threshold level, will be within the GST framework. Manufacturers and traders will pay less tax after GST Implementation.

(vii) **Entertainment** : With GST, taxes can do down by 2 - 4%, but the rate of tax for cinema lovers will be increased. GST will soon comprehend with demands and bring best for boosting up the film industry's business.

### Challenges of GST Implementation:

The following are some of the major challenges for GST implementation in India (Poddar & Ahmad, 2009):

(i) **Types of GST** : As GST would be of two types : Central GST and State GST and further division is required on the basis of utmost necessity and property based like need, location, geography, and resources which has to be worked upon.

(ii) **Rates of Tax** : Still the tax rate is not fully finalized and lots more has to be worked upon considering the standard of living of people, etc.

(iii) **Tax Management and Technology Infrastructure** : It is utmost necessary that proper management of tax and infrastructure is required to implement proper policies and plans.

(iv) Establishment and upgradation of IT framework

(v) Meeting implementation challenges

(vi) Effective coordination between Centre & State tax administrations

(vii) Reorganization of field formations

(viii) Training of Officials and Trade & Industry

(ix) Augmentation of human resources

(x) Spreading Accounting Literacy

(xi) Developing IT skills

(xii) Reorganisation of Audit procedures and Harmonization of processes & procedures between CGST / IGST & SGST Law

### Conclusion

Primarily, the concept of GST was introduced and proposed in India a few years back, but implementation has been done by the current BJP government under the able leadership of Prime Minister Shri Narendra Modi on July 1, 2017. The new government was in strong favor for the implementation of GST in India by seeing many positive implications as discussed above in the paper. All sectors in India - manufacturing, service, telecom, automobile and small SMEs will bear the impact of GST. One of the biggest taxation reform- GST will bind the entire nation under a single taxation system rate. As forecasted by experts, GST will improvise tax collections and boost up India's economic development and break all tax barriers between Central and State Governments. No doubt, GST will give India a clear and transparent taxation system, but it is also surrounded by various

challenges as discussed in this paper. There is need for more analytical based research for successful implementation.

After GST implementation, there is emergent requirement of modern technology based infrastructure like GSTNET for successful monitoring of taxation system as well as the GST Council should regularly conduct meetings for change in tax reflections. These areas can be covered by researchers in future studies.
